

Phạm Cao Minh Quân

Full Stack Developer

+84 794 993 996 | minhquany9@gmail.com | Thủ Đức, TP.HCM
linkedin.com/in/quanpham7323 | github.com/minhquan7323

Skilled in front-end & back-end development, passionate about problem-solving and building creative web applications

EDUCATION

SGU - Sai Gon University

9/2021 - Now

Majors: Information Technology

TECHNICAL SKILLS

Languages: JavaScript, PHP

Frontend: ReactJS, NextJS, Bootstrap, Chakra UI, Ant Design, Material UI, Socket.IO, TailwindCSS, TanStack Query, Redux

Backend: NodeJS (ExpressJS)

Databases/Cache: MySQL, MongoDB, MS SQL Server

Version Control: Git (GitHub, GitLab)

DevOps/Cloud: Docker, GitHub Actions, AWS, Nginx, Firebase, Cloudinary

Foreign languages: [TOEIC 785](#)

EXPERIENCE

Full Stack Developer ENOCH TECH SOFTWARE DEVELOPMENT AND SOLUTIONS CO.,LTD

01/2025 – 03/2026

Played a key role in the end-to-end development and optimization of multiple core company platforms across diverse industries, including public-facing websites like e-commerce, real estate, recruitment, and internal management systems.

- Full-Stack Development:** Built responsive UIs and robust backend architectures, ensuring seamless system integration.
- Frontend Optimization:** Built user-centric dashboards and interactive UIs using ReactJS, Chakra UI, and Ant Design. Engineered complex search, filtering, and data visualization features to significantly enhance user experience.
- Backend & API Integration:** Developed RESTful APIs, managed databases for high-volume transactions, and handled secure data flow between the server and user interfaces.
- Real-time Features & Security:** Successfully integrated real-time communication tools (chat and notifications) using Socket.IO and established secure user authentication workflows via Firebase Authentication.
- DevOps & Infrastructure:** Managed web application deployment and cloud hosting environments using Docker, Nginx, and AWS (EC2). Streamlined release processes and ensured high system availability across all production platforms.
- Key Impact:** Accelerated the end-to-end delivery of 5 major web platforms from concept to production. By optimizing both software architecture and deployment pipelines, improved overall system scalability and provided robust, complete technical solutions for a diverse client base.

PROJECTS

Web News Platform Full Stack Developer

01/2025 – 04/2025

Tech Stack: MERN, Redux, Chakra UI, Ant Design, Cloudinary, Docker, Nginx, AWS EC2

Demo: web-news.bockblackcig.id.vn | GitHub: github.com/minhquan7323/Web-News

Bookstore E-commerce Full Stack Developer

09/2024 – 01/2025

Tech Stack: MERN, Redux, JWT, Cloudinary, PayPal, Docker, Nginx, AWS EC2

Demo: book-store.bockblackcig.id.vn | GitHub: github.com/minhquan7323/Web-Manga
